

Aircraft Testimonials

As a Law enforcement agency that operates Astar and Huey helicopters, we wanted a product that could provide a safe and convenient maintenance platform for both airframes, on or off the cart. The Scissor Deck is a great product, that does just that. Our maintenance crew has a safe stable platform to conduct everything from daily's to heavy maintenance. The ability to use it on the cart gets us out of maintenance and back in service in no time.

Thank you, **Shane Engelauf, Chief Pilot Charlotte County Sheriff's Office**

Finally getting around to sending a couple good photos on our new stand in action. Receiving excellent feedback from my guys on ease of use and functionality. Recently found a new use where the guys raise it up to the leading edges of the engine intakes for polishing. Yet another use for your deck. Windshield change on a G550.

Best Regards, **Henry Mast, Chief of Maintenance, Facilities & Field Operations
Phillips 66 Aviation, Houston, TX**
